On the toolbar, click Add Delphi tool. - Download Xtools Pro Arcgis 10. Describes the features added in 10. 0 Download the latest version of Xtools. But it is quite hard to work with.Q: Why do we need to use the error-prone Eigenvaluation? I was reading some internal eigen routines in Eigen and found this rather strange behavior for the internal error-prone evaluation(_Eval): inline Scalar

```
_Eval(const MatrixBase& m, const typename Derived::PlainObject& _x) { // _x is the evaluated object return m.derived().nestedExpression().solve(_x); }
```

Then this is the implementation for solve: /** \returns the solution to \f\$ A x = b \f\$ using the current decomposition of \a m. * * This method solves both \f\$ A x = b \f\$ and \f\$ A^T x = b \f\$
